

T 8091 EN

Type 3510-1 and Type 3510-7 Pneumatic Control Valves

Type 3510 Micro-flow Valve

DIN version

Application

Control valve especially designed for controlling low flow rates in pilot plants and technical research facilities

Valve size G 1/8 · G 1/4 · G 3/8 · G 1/2 · G 3/4
1/8 NPT · 1/4 NPT · 3/8 NPT · 1/2 NPT · 3/4 NPT
DN 10 · DN 15 · DN 25

Pressure rating PN 40 to 400

Temperatures -196 to +450 °C

Type 3510 Micro-flow Valve with

- Type 3271-5 Pneumatic Actuator
- Type 3277-5 Pneumatic Actuator

Available as

- Globe valve
- Angle valve

Valve body with

- G or NPT female thread
- Welding ends or flanges

Stainless steel is used as the standard body material. However, a wide variety of special materials can also be used on customer request.

A mounting kit (1400-9031) provides the valve with an interface according to IEC 60534-6-1 (NAMUR) for attachment of positioners, limit switches, solenoid valves and other valve accessories. We recommend using an insulating section or bellows seal for flanged valves to provide more space to mount valve accessories.

Standard version

- For temperatures from -10 to +220 °C
- PN 40 to 400
- Globe or angle valve
- Female thread G 1/8 · G 1/4 · G 3/8 · G 1/2 · G 3/4 or 1/8 NPT, 1/4 NPT, 3/8 NPT, 1/2 NPT, 3/4 NPT
- Flanges DN 10, 15 or 25
- Welding ends DN 10, 15 or 25

Type 3510-1 · With Type 3271-5 Pneumatic Actuator (120 cm²) · See Data Sheet ▶ T 8310-1

Type 3510-7 (Fig. 1 and Fig. 2) · With Type 3277-5 Pneumatic Actuator (120 cm²) for integral positioner attachment · See Data Sheet ▶ T 8310-1

Further versions

- **Insulating section** for temperatures from -196 to +450 °C, with special material up to +650 °C

Fig. 1: Type 3510-7 Control Valve with Type 3725 Positioner

Fig. 2: Type 3510-7 Control Valve with Type 3767 Positioner

- **Metal bellows seal** up to PN 250 or PN 325 with a sealing performance of $\leq 10^{-5}$ (mbar l)/s
- **Handwheel**
- **Electric actuator** · On request
- **Stainless steel actuator** for ambient temperatures down to -60 °C · On request
- **Body connections with threaded flanges** and lens ring gaskets in valve sizes DN 6 and 10, nominal pressure PN 325, dimensions acc. to IG standard ($K_{VSmax} = 0.4$)

Principle of operation

The medium flows through the micro-flow valve in the direction indicated by the arrow. The plug position determines the cross-sectional area between the seat and plug.

The plug stem is connected to the actuator stem by the stem connector and sealed with an adjustable packing.

To comply with stricter environmental emissions requirements, the valve can be equipped with a double-walled metal bellows.

The anti-rotation fixture prevents a loosening of the screw connection between the valve body and the bonnet or the intermediate piece.

Fail-safe position

Depending on how the springs are arranged in the pneumatic actuator (► T 8310-1), the valve has two different fail-safe positions.

- **Actuator stem extends (fail-close)**
The valve closes when the supply air fails.
- **Actuator stem retracts (fail-open)**
The valve opens when the supply air fails.
